**YALIS®**

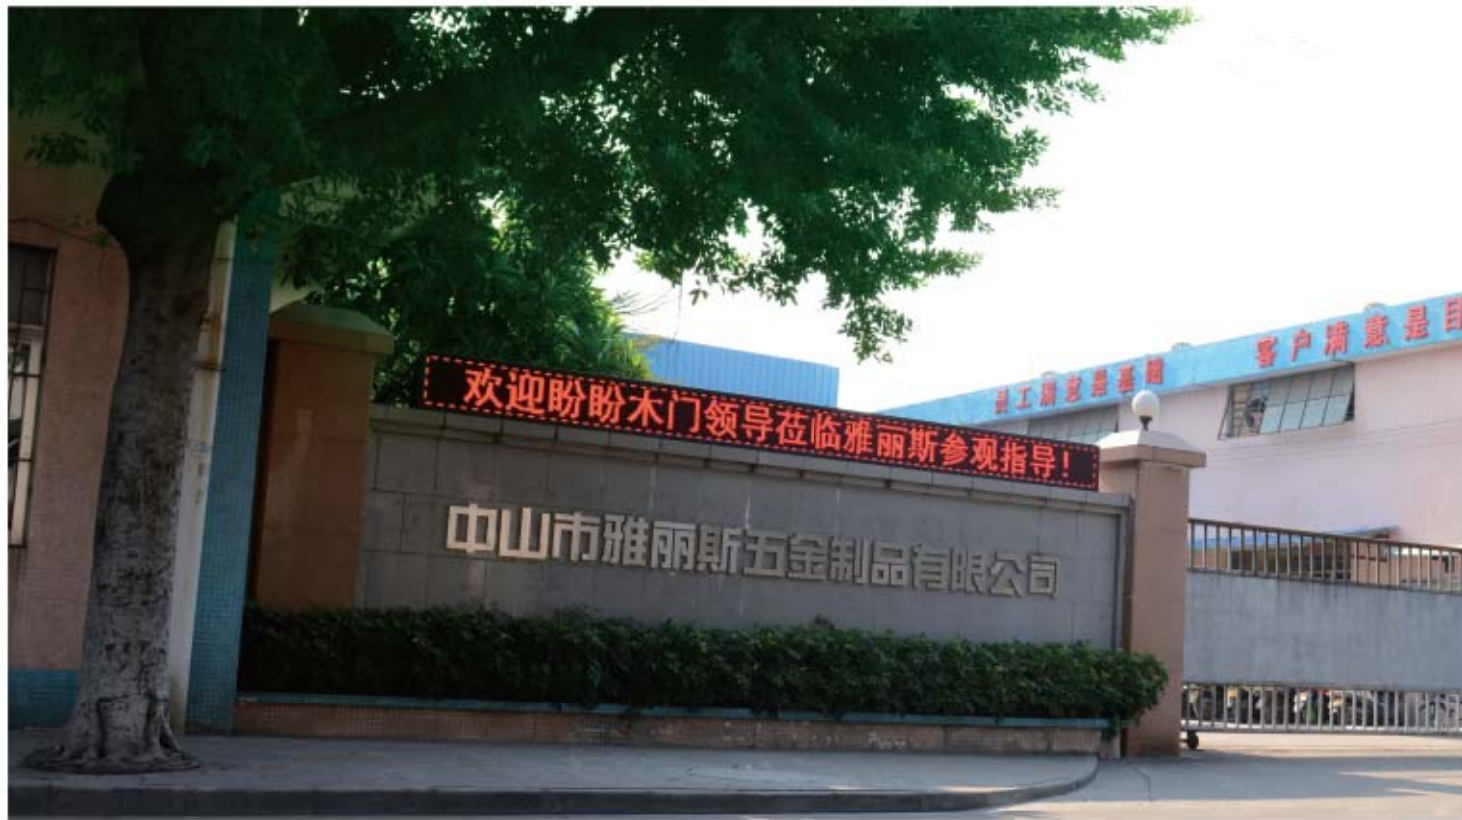

**ARCHITECTURAL HARDWARE**

www.yalishardware.com

THANK YOU FOR YOUR  
OPENING THE **YALIS**  
PRODUCT CATALOG.

As a visionary and pioneering company in Hardware, was established in 1991 by Mr Lee. With a passion to create something unique, Yalis has created several series of patented products which are very elegant. Moreover, Yalis hardware, locate in XiaoLan Town, where it is generally known as the industrial base of China Hardware.

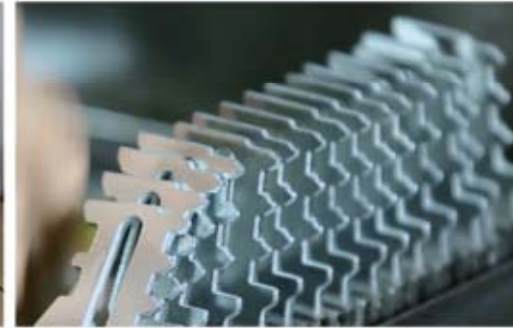

As 15 years goes by, Yalis has become a brand with security, trust, innovation and integrity. Yalis has accumulate thousand of customers and cooperative partners, making Yalis develop better and better. Yalis' s products are- Door Handles & Pull handles in various metals, Door Locks, Door hinges, and other builder hardware accessories and many more. The Group has also spread its wings into specialized Mechatronic Locking systems, and has introduced its complete range of sanitary and bath fittings.

Yalis hardware, is a company with strong production line, from mold design and produce, die-casting, polishing, and electroplating. And the excellent professional and technical personnel team makes sure the high efficient production. How do we define the strong production line? Yalis owns over 3000 square meters warehouse for meeting the demand from various clients. Due to the huge warehouse, Yalis is able to finish the big order within 35 days. Besides, as for the production workshop, it is also over 3000 square meters, including the mold department, die-casting department, and polishing department.

Yalis adopt high standard electroplating technique (7 layers). Yalis has many finishes to fit different market. In our shining chrome products, Yalis can meet over 300 hours neutral salt spray test (NSS), and over 24 hours CASS test. High standard electroplating technique lead to the high quality. Also, Yalis has a perfect production line from material, diecasting, machining, polishing, electroplating, quality checking, assembling and packaging. Yalis, as a professional manufacturer, we have More than 20 advanced die casting machine, processing equipment and polishing equipment. From product R&D to technology innovation, from work procession to quality inspection, Yalis always insists on innovating technology, continually introducing characteristic door locks, and offering our clients a new high quality life experience.

In the future, Yalis will create more aesthetic products to meet the needs of customers and cooperative partners. That is why we always said: Choosing Yalis, Open door with elegance.

## Die-casting Department

There are 10 sets die-casting machines in Yalis die-casting department, working pressure from 90 tons to 280 tons for different kinds of door locks. Yalis die-casting machines make high quality appearance with no rippling and micro pores. It is no exaggeration to say that Yalis production facility is one of the leader in Zhongshan city, even in China.

### **Quality control, strong QC team**

Each process is strictly controlled by our strong QC team, and gives you high quality Guarantee products make you free of trouble.

## Direction of the handles:

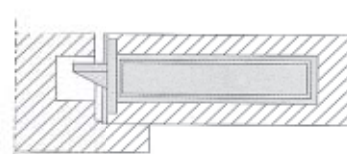

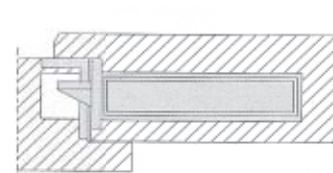

## Standard for opening directions:

When the door is close, people stand outdoor,  
hinge on the left, it is called left.  
hinge on the right, it is called right.

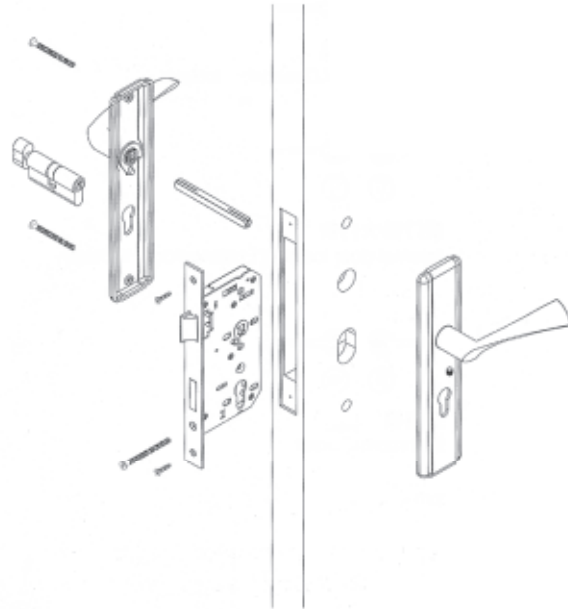

## Door type

Profile of a rebated door with mortise lock (forend protruding on one side).  
Profile of a non-rebated door with mortise lock (forend protrudes on both side).

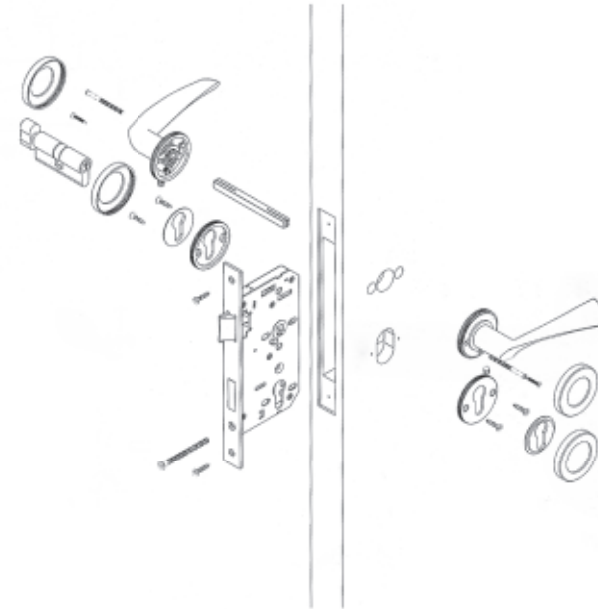

# Installation Diagram:

## American Entrance Handleset

American lockset is anti-theft and luxury lockset, which is equipped with large backplate and handle. Mainly apply to the use of large off-type of hotels and villas.

### Functions:

#### Pry function

When the locked bolt is pressed down and the deadbolt is unlocked, the door can't be opened outside by the thumb piece, and need key to open.

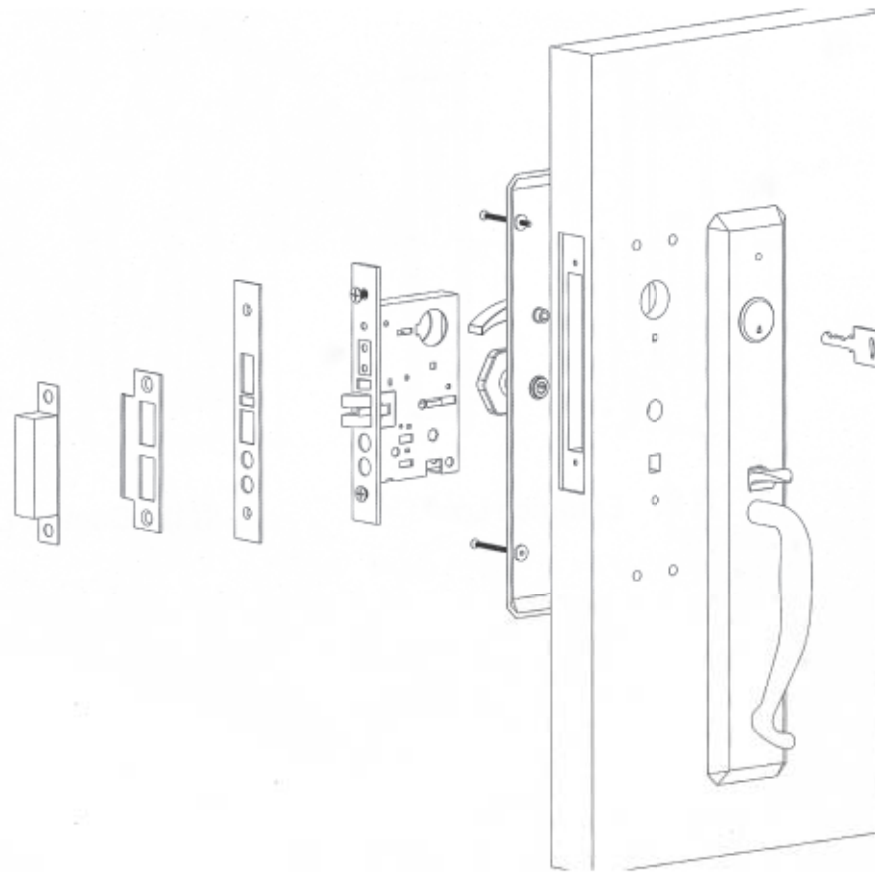

#### Anti-thrust function

Locked the door with keys outside or with the thumb turn inside, the deadbolt would be extended and the locked bolt and anti-thrust latch would be press down. At this time, key only outside.

#### Escape function

When the door locked, the deadbolt and the latch can be withdrawn simultaneously by inside handle.

## Installation diagram

## Lockcase Reversible Direction

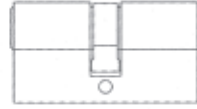

Put the lockcase upside down, press the latch into the lockcase by hand when the block fall down naturally. Then use screwdriver to drive back the latch extension unit in order to allow the latch rotated 180 degree and let it reset.

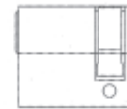

## Category

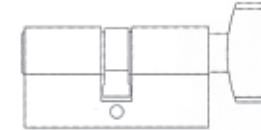

Euro cylinder

Double cylinder

Half cylinder

Thumb turn cylinder

## Door leaf thickness

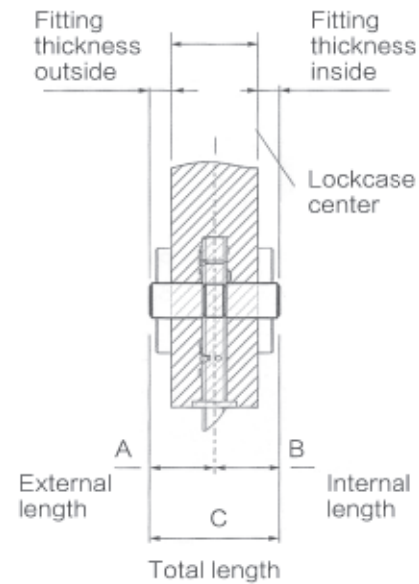

Determination of the cylinder length

The total length of cylinder = door thickness + thickness of the fitting on the outside + thickness of the fitting on the inside

Cylinder is equal side cylinder if it is fitted in the middle of door

Cylinder is unequal side cylinder if it isn't in the middle of door

The cylinder must protrude only max 2 -3mm from the fitting on the outside and inside

## Master key system

Where one or more locking cylinder are not only operated by an individual key, but also by superior keys, so called master key system is created.

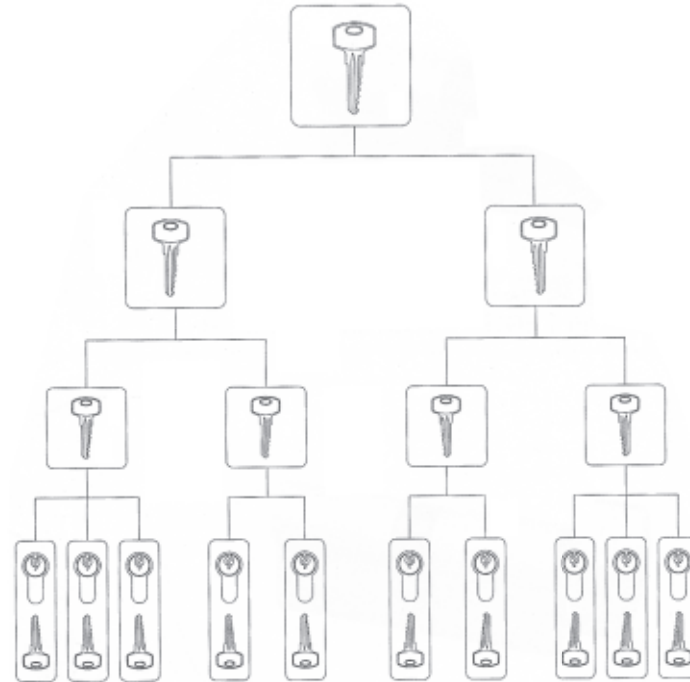

Master key system is usually used for apartment, office building, commercial space, warehouse and so on.

## Grand master key system

Each group of locks is operated by one master key with an overall grand master key.

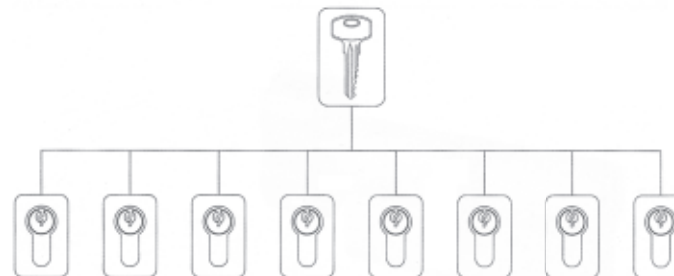

According to different identity and job title, there are several level of master keys can be set to operate different sets of lock.

Master key system can be settle in different lever as needed.

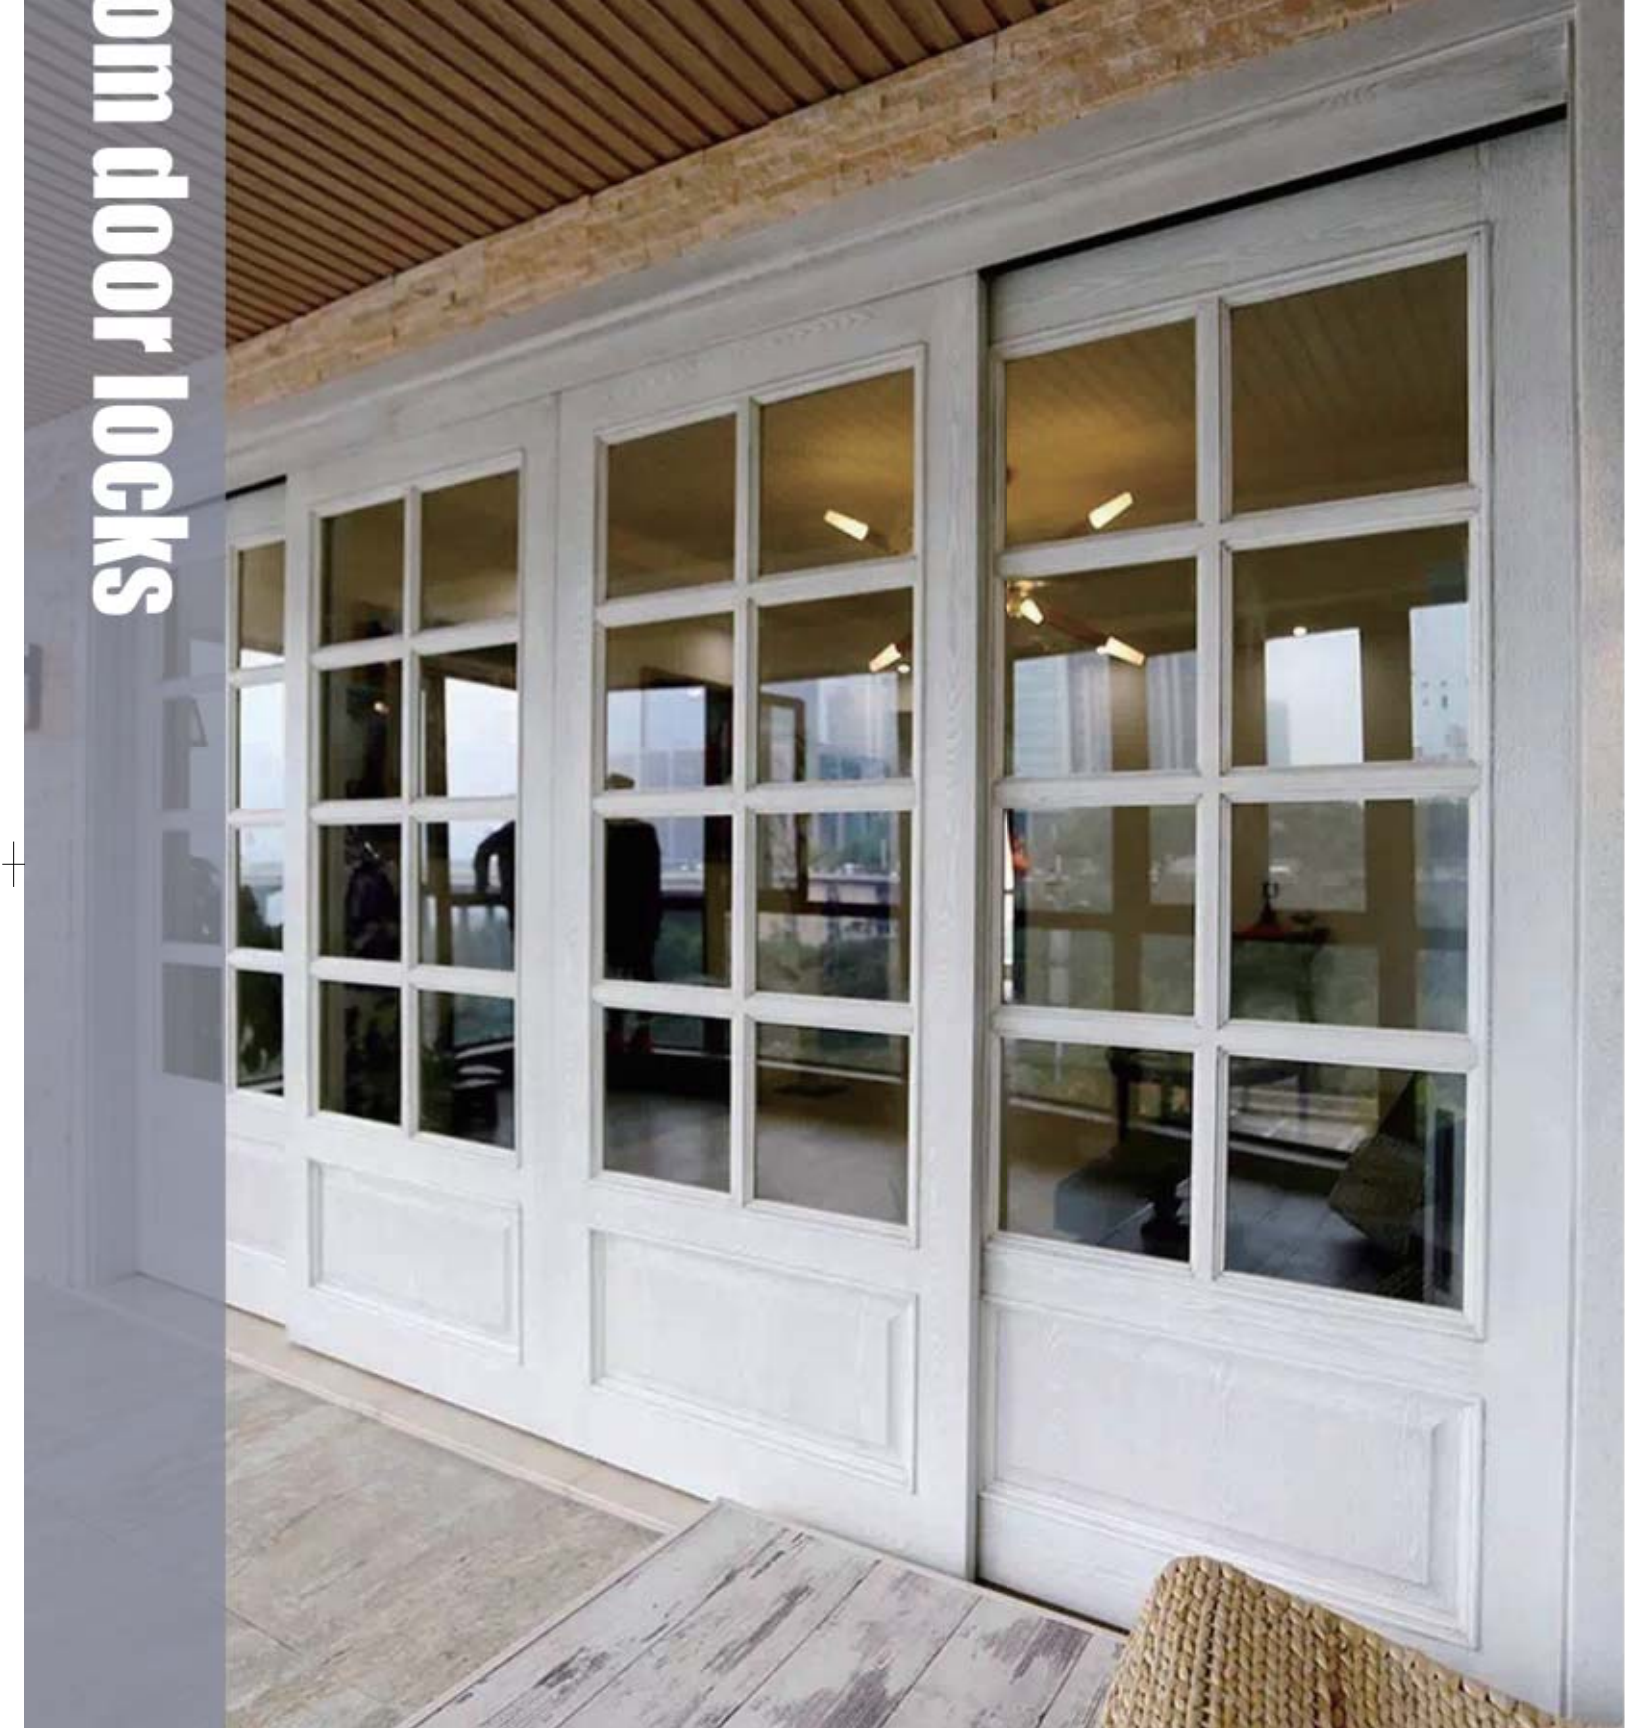

## Key Alike System

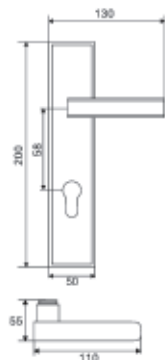

In key alike system, a number of lock can be operated by the same key.
